

### **Practical No:03**

Name : Deepankar Sharma  
Course: BCA  
University Roll No: 2092014  
Student Id : 20041299  
Semester: 3  
Date: October 15, 2021

**Objective:** WAP to create a default constructor of class Student(name, roll no, age, and course) and print its content

#### **Code :**

```
class _03_Student{
    String name;
    int rollno;
    String Course;
    int age;

    _03_Student(){
        name="Deepankar Sharma";
        rollno=14;
        Course="Bachelors of Computer Applications";
        age= 18;
    }

    public void show(){
        System.out.println("\n\nThe name of student is: "+ name);
        System.out.println("The age of student is: "+ age);
        System.out.println("The roll no of student is: "+ rollno);
        System.out.println("The course of student is: "+ Course);
    }
}

public class _03_defaultConstructor {
    public static void main(String[] args) {
        _03_Student obj= new _03_Student();
        obj.show();
    }
}
```

**Output:**

The name of student is: Deepankar Sharma

The age of student is: 18

The roll no of student is: 14

The course of student is: Bachelors of Computer Applications
