

Problem Statement 1- Develop an Android Application to display some text on the screen

Objective- To print some Text on the screen.

Activity_main.xml file

```
<?xml version="1.0" encoding="utf-8"?>
<LinearLayoutxmlns:android="http://schemas.android.com/apk/res/android"
xmlns:app="http://schemas.android.com/apk/res-auto"
xmlns:tools="http://schemas.android.com/tools"
android:layout_width="match_parent"
android:layout_height="match_parent"
tools:context=".MainActivity"
android:gravity="center">

<TextView
android:layout_height="wrap_content"
android:layout_width="wrap_content"
android:text="Hi! How are you?"/>

</LinearLayout>
```

MainActivity.java file

```
package com.example.my_textapplication;

import androidx.appcompat.app.AppCompatActivity;
import android.os.Bundle;

public class MainActivity extends AppCompatActivity {
    @Override
    protected void onCreate(Bundle savedInstanceState) {
        super.onCreate(savedInstanceState);
        setContentView(R.layout.activity_main);
    }
}
```

AndroidManifest.xml file

```
<?xml version="1.0" encoding="utf-8"?>
<manifest xmlns:android="http://schemas.android.com/apk/res/android"
xmlns:tools="http://schemas.android.com/tools">

<application
android:allowBackup="true"
android:dataExtractionRules="@xml/data_extraction_rules"
android:fullBackupContent="@xml/backup_rules"
android:icon="@mipmap/ic_launcher"
```

Name – Gurpreet Kaur Jassal

Subject- Mobile Application Development

Section-A
Subcode-PBC 502

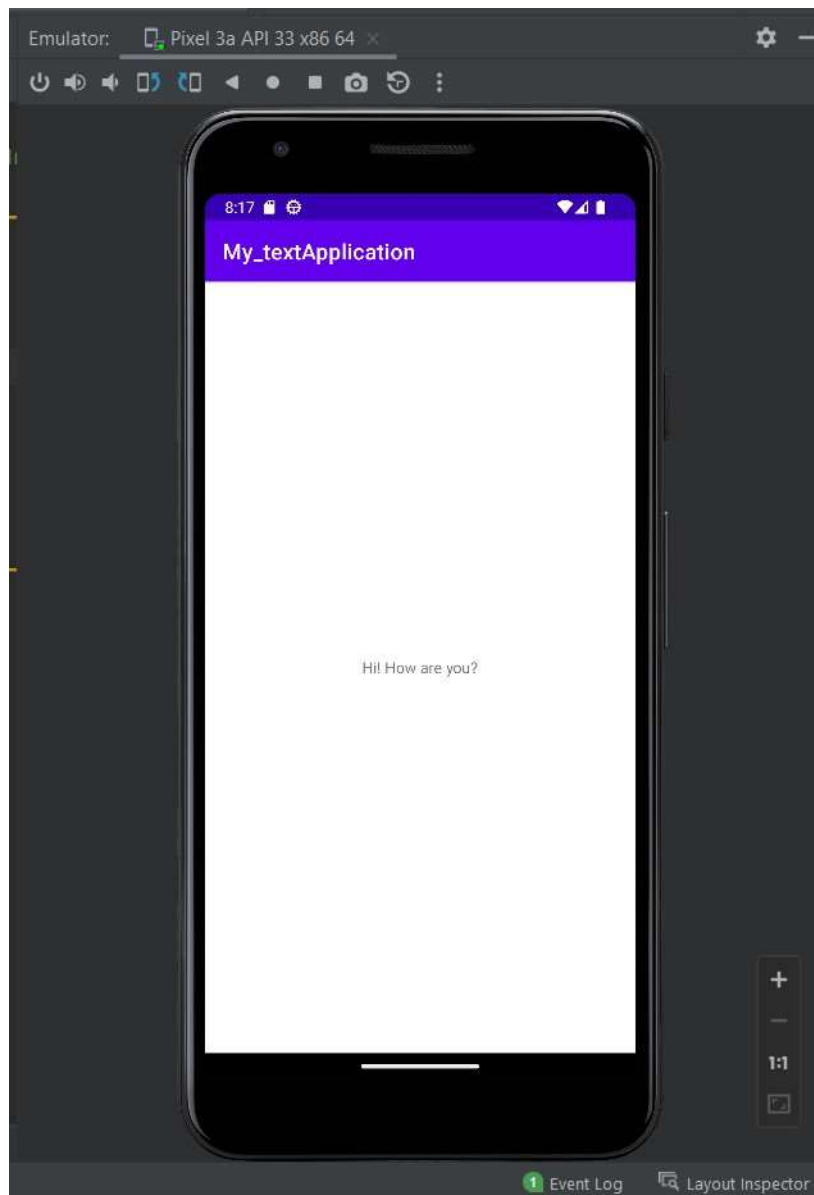

```
android:label="@string/app_name"
android:roundIcon="@mipmap/ic_launcher_round"
android:supportsRtl="true"
android:theme="@style/Theme.My_textApplication"
tools:targetApi="31">
<activity
android:name=".MainActivity"
android:exported="true">
<intent-filter>
<action android:name="android.intent.action.MAIN" />

<category android:name="android.intent.category.LAUNCHER" />
</intent-filter>

<meta-data
android:name="android.app.lib_name"
android:value="" />
</activity>
</application>

</manifest>
```

OUTPUT

Problem Statement 2- Develop an Android Application to change the Background Color on button click

Objective- To change the Button color.

Activity_main.xml file

```
<?xml version="1.0" encoding="utf-8"?>
<LinearLayoutxmlns:android="http://schemas.android.com/apk/res/android"
xmlns:app="http://schemas.android.com/apk/res-auto"
xmlns:tools="http://schemas.android.com/tools"
android:layout_width="match_parent"
android:layout_height="match_parent"
tools:context=".MainActivity"
android:gravity="center">

<TextView
android:layout_width="wrap_content"
android:layout_height="wrap_content"
android:text="Hello!!!"
android:textSize="50dp" />

<Button
android:id="@+id/b1"
android:layout_width="200dp"
android:layout_height="60dp"
android:text="Button1" />

</LinearLayout>
```

MainActivity.java file

```
package com.example.my_colorapplication1;

import androidx.appcompat.app.AppCompatActivity;
import android.graphics.Color;
import android.os.Bundle;
import android.view.View;
import android.widget.Button;
public class MainActivity extends AppCompatActivity {
    @Override
    protected void onCreate(Bundle savedInstanceState){
        super.onCreate(savedInstanceState);
        setContentView(R.layout.activity_main);
        Button btn;
        btn = findViewById(R.id.b1);
        btn.setOnClickListener(new View.OnClickListener() {
            @Override
            public void onClick(View v){
```

```
btn.setBackgroundColor(Color.CYAN);  
    }  
    });  
}  
}
```

AndroidManifest.xml file

```
<?xml version="1.0" encoding="utf-8"?>  
<manifest xmlns:android="http://schemas.android.com/apk/res/android"  
    xmlns:tools="http://schemas.android.com/tools">  
  
    <application  
        android:allowBackup="true"  
        android:dataExtractionRules="@xml/data_extraction_rules"  
        android:fullBackupContent="@xml/backup_rules"  
        android:icon="@mipmap/ic_launcher"  
        android:label="@string/app_name"  
        android:roundIcon="@mipmap/ic_launcher_round"  
        android:supportRtl="true"  
        android:theme="@style/Theme.My_colorApplication1"  
        tools:targetApi="31">  
        <activity  
            android:name=".MainActivity"  
            android:exported="true">  
            <intent-filter>  
                <action android:name="android.intent.action.MAIN" />  
  
                <category android:name="android.intent.category.LAUNCHER" />

android:value="" />
</activity>
</application>

</manifest>
```

OUTPUT

Problem Statement 13-Create an android application to create a Toggle Button having two values as ON and OFF and also insert a submit button. When the user clicks on Submit Button, then a Toast Message should generate displaying the state of the Toggle Button.

Objective-To display Toggle Button

Activity_main.xml file

```
<?xml version="1.0" encoding="utf-8"?>
<RelativeLayout xmlns:android="http://schemas.android.com/apk/res/android"
    xmlns:app="http://schemas.android.com/apk/res-auto"
    xmlns:tools="http://schemas.android.com/tools"
    android:layout_width="match_parent"
    android:layout_height="match_parent"
    tools:context=".MainActivity">

    <ToggleButton
        android:layout_width="wrap_content"
        android:layout_height="wrap_content"
        android:id="@+id/toggleButton"
        android:text="ToggleButton"
        android:textOff="Off"
        android:textOn="On"
        android:layout_below="@+id/button"
        android:layout_centerHorizontal="true"
        android:layout_margin="70dp"
        android:textSize="30dp" />

    <Button
        android:layout_width="wrap_content"
        android:layout_height="wrap_content"
        android:id="@+id/button"
        android:layout_margin="70dp"
        android:layout_centerHorizontal="true"
        android:text="Submit"/>

</RelativeLayout>
```

MainActivity.java

```
package com.example.myapplication;

import androidx.appcompat.app.AppCompatActivity;

import android.os.Bundle;
import android.view.View;
import android.widget.Button;
import android.widget.Toast;
import android.widget.ToggleButton;
```

```
public class MainActivity extends AppCompatActivity {
    ToggleButton toggleButton1;
    Button buttonSubmit;

    @Override
    protected void onCreate(Bundle savedInstanceState) {
        super.onCreate(savedInstanceState);
        setContentView(R.layout.activity_main);
        toggleButton1=findViewById(R.id.toggleButton);
        buttonSubmit=findViewById(R.id.button);
        buttonSubmit.setOnClickListener(new View.OnClickListener() {
            @Override
            public void onClick(View view) {
                String res;
                res= toggleButton1.getText().toString();
                Toast.makeText(getApplicationContext(),res,Toast.LENGTH_LONG).show();
            }
        });
    }
}
```

AndroidManifest.xml file

```
<?xml version="1.0" encoding="utf-8"?>
<manifest xmlns:android="http://schemas.android.com/apk/res/android"
    xmlns:tools="http://schemas.android.com/tools">

    <application
        android:allowBackup="true"
        android:dataExtractionRules="@xml/data_extraction_rules"
        android:fullBackupContent="@xml/backup_rules"

```
tools:targetApi="31">
<activity
  android:name=".MainActivity"
  android:exported="true">
  <intent-filter>
    <action android:name="android.intent.action.MAIN" />

    <category android:name="android.intent.category.LAUNCHER" />
  </intent-filter>

  <meta-data
    android:name="android.app.lib_name"
    android:value="" />
  </activity>
</application>

</manifest>
```

OUTPUT

Problem Statement 26- Develop an android application to implement Bluetooth Adapter class. Create three buttons and provide functionality as follows

- 1) On and Off the Bluetooth Adapter
- 2) Scanning for near by available devices
- 3) List out all the paired devices

Activity_main.xml file

```
<?xml version="1.0" encoding="utf-8"?>
<RelativeLayout xmlns:android="http://schemas.android.com/apk/res/android"
    xmlns:app="http://schemas.android.com/apk/res-auto"
    xmlns:tools="http://schemas.android.com/tools"
    android:layout_width="match_parent"
    android:layout_height="match_parent"
    tools:context=".MainActivity">

    <Button
        android:id="@+id/ONN"
        android:layout_width="100dp"
        android:layout_height="70dp"
        android:layout_marginTop="100dp"
        android:text="ON"
        android:layout_marginLeft="30dp"/>

    <Button
        android:id="@+id/OFFF"
        android:layout_width="100dp"
        android:layout_height="70dp"
